

ADDENDUM

Mayhem R/C Car Cat. No. 60-4260

The description of when to replace batteries and installing the antenna tube is incompletely described in the Owner's Manual.

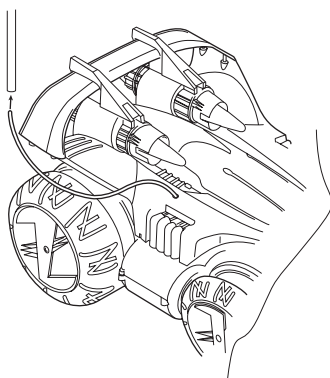

Installing Batteries In the Transmitter (see Page 2)

When the power indicator flashes *immediately* after turning on the power, replace the batteries.

Note: The racer's transmitter has special power saving circuitry. If you leave the transmitter in one position for over 40 seconds, it shuts off transmission and the power indicator flashes.

Installing the Antenna Tube

The antenna tube holds up the racer's antenna wire for the best reception and range. Route the antenna wire's loose end through the tube. Insert the tube securely in the racer's antenna tube holder. The replacement part number is RSU 12281671.
